## RUGGEDLY BEAUTIFUL

# The digEplayer L7 offers endurance and entertainment.

## Designed to entertain while surviving in-flight use

Since launching the digEplayer L7, we have claimed that it is a tough device. Well, we decided to test that claim. The L7, iPad and Samsung Tab were subjected to repeated drops, soda, a cement mixer and even gunfire. The result? The digEplayer L7 out-performed the other devices. Couple that with amazing entertainment, and you've got a winner.

### LONG BATTERY LIFE

Lasting over 18 hours, the digEplayer L7 is perfect for short turn times.

### LARGE TOUCH SCREEN

Built with capacitive touch screen technology, browsing the L7 is seamless.

### CUSTOMIZABLE

Easily brand the graphical user interface (GUI) to match your unique style.
