OFF-THE-SHELF IFE SOLUTION

Leverage consumer brands and our content prowess.

Introducing another innovation from digEcor

Recognizing that some of our customers find value in using a consumer brand device, we have introduced the digEtab, a repurposed Galaxy Tab 2 10.1 suitable for in-flight use. In addition to an extended battery for 20 hours of continuous video playback, the ruggedized Galaxy Tab uses an easily swapped SD card for content loading.

EXTENDED BATTERY

An easy to remove 12 hour battery extends playback time to 20 hours.

PROTECTIVE CASE

A protective case ruggedizes the device and ensures a longer life.

LED INDICATORS

The external indicator lights let you instantly know if the battery is charged.
